O&M contract: indexed fee 2025 and 2026

Maintenance & Monitoring agreement, solar project PreZero Alphen aan den Rijn (605.84 kWp). MD Service BV (client) and Sunprojects BV (contractor), dated 25 April 2024. Calculation prepared 30 September 2026.

Result: annual fee (excl. VAT)

Year	Indexation factor	Annual fee
2024 (base, price level 1 Jan 2024)	-	EUR 3,029.00
2025	**1.06492 (+6.49%)**	**EUR 3,225.64**
2026	**1.04803 (+4.80%)**	**EUR 3,380.56**

Base: EUR 5.00/kWp per year x 605.84 kWp = EUR 3,029.00 (art. 7.1).

Indexation formula (art. 8)

New price = current price x ½ x ($I_{p,n-1}$ / $I_{p,n-2}$ + $I_{m,n-1}$ / $I_{m,n-2}$), applied each 1 January from 1 January 2025. I_p is the July index of cao hourly wages for private companies; I_m is the July index of cao hourly wages in the metal and electrical engineering industry. Each year's increase is applied to the previous year's indexed price.

CBS July index figures used

CBS StatLine table 85663NED, cao-lonen per uur incl. bijzondere beloningen, 2020 = 100, current figures (table updated 3 September 2026). The July 2024 and July 2025 values were supplied by the client; the July 2023 values are taken from the same CBS series. The contract refers to the older 2000 = 100 base; only the ratios matter, so the base does not affect the result.

July index	2023	2024	2025
Ip: total, all cao sectors	112.4	120.3	125.8
Im: electrical engineering & machinery (SBI 26-28)	112.5	119.2	125.2

Working

	Ip ratio	Im ratio	Average	New fee
2025 (July 2024 / July 2023)	1.07028	1.05956	1.06492	EUR 3,225.64
2026 (July 2025 / July 2024)	1.04572	1.05034	1.04803	EUR 3,380.56

CBS no longer publishes a single 'metal and electrical engineering industry' index. I_m uses the SBI 26-28 electrical engineering and machinery index only.

Alternative: Ip based on private companies

The contract names the index for private companies (particuliere bedrijven). That CBS series has July values of 111.8 (2023), 120.0 (2024) and 125.8 (2025). With the same I_m:

Ip based on	2025	2026
Total, all cao sectors (used above)	EUR 3,225.64	EUR 3,380.56
Private companies	EUR 3,230.28	EUR 3,389.64

Other prices indexed under art. 8

Item	Contract price	2025	2026
Hourly rate, on site (art. 7.7a)	EUR 75.00	EUR 79.87	EUR 83.71
Call-out fee (art. 7.7a)	EUR 90.00	EUR 95.84	EUR 100.44
SIM card, per month (art. 4.2)	EUR 16.75	EUR 17.84	EUR 18.70
SIM card with static IP, per month (art. 4.2)	EUR 23.50	EUR 25.03	EUR 26.23

Points to note

• **Revised vs first-published figures.** These are CBS's current (revised) figures. When Sunprojects made its December 2024 proposal, the first-published July 2024 index for all cao sectors was 120.1 instead of 120.3, so an invoiced 2025 price may differ by a few euros.

• **Indexation is not automatic.** Prices 'can' be adjusted, and Sunprojects must submit a proposal before 1 December for the following year. Without a proposal, the client can argue the price was not indexed for that year.

• **Termination deadline.** Notice to end the contract at the end of a calendar year must be given before 1 October of that year (art. 2.2). Otherwise the contract runs through the next year.

• **2024 was a partial year.** The contract started 1 May 2024, so 2024 was invoiced pro rata (about EUR 2,028 for 245 of 366 days). The full annual price of EUR 3,029.00 is the base for indexing.
